In this repository, I will tell you how to install DVWA (Damn Vulnerable Web Application) as a testing machine for testing purpose.

1. We will update and upgrade the all software of Kali Linux.

Sudo apt update && Sudo apt upgrade -y

```
┌──(root㉿kali)-[/home/ghost]
└─# sudo apt update && sudo apt full upgrade -y
Hit:1 http://http.kali.org/kali kali-rolling InRelease
7 packages can be upgraded. Run 'apt list --upgradable' to see them.
Error: Invalid operation full
```

2. Now, I will install docker in the terminal by command

Sudo apt install docker.io

```
┌──(root㉿kali)-[/home/ghost]
└─# sudo apt install docker.io
Installing:
  docker.io

Installing dependencies:
  containerd      libintl-xs-perl            python3-protobuf
  criu            libmodule-find-perl        python3-pycriu
  docker-buildx   libproc-processtable-perl  runc
  docker-cli      libsort-naturally-perl     tini-static
  libcompel1      libterm-readkey-perl
  libintl-perl    needrestart

Suggested packages:
  containernetworking-plugins  debootstrap  xfsprogs
  docker-doc                   rinse        zfs-fuse
  btrfs-progs                  rootlesskit  | zfsutils-linux

Summary:
  Upgrading: 0, Installing: 17, Removing: 0, Not Upgrading: 7
  Download size: 87.9 MB
  Space needed: 368 MB / 30.7 GB available

Continue? [Y/n] y
Get:3 http://kali.download/kali kali-rolling/main amd64 libcompel1 amd64 4.2-
2 [63.0 kB]
Get:4 http://kali.download/kali kali-rolling/main amd64 criu amd64 4.2-2 [556
 kB]
Get:5 http://http.kali.org/kali kali-rolling/main amd64 docker-buildx amd64 0
```

3. Now. I will compose docker in kali Linux using command

Sudo apt install docker.io docker-compose

```
┌──(root㉿kali)-[/home/ghost]
└─# sudo apt install docker.io docker-compose
docker.io is already the newest version (27.5.1+dfsg4-2).
Installing:
  docker-compose

Summary:
  Upgrading: 0, Installing: 1, Removing: 0, Not Upgrading: 7
  Download size: 13.5 MB
  Space needed: 68.1 MB / 30.4 GB available

Continue? [Y/n] y
Get:1 http://kali.download/kali kali-rolling/main amd64 docker-compose amd64
2.32.4-3 [13.5 MB]
Fetched 13.5 MB in 6s (2,221 kB/s)
Selecting previously unselected package docker-compose.
(Reading database… 427019 files and directories currently installed.)
Preparing to unpack …/docker-compose_2.32.4-3_amd64.deb…
Unpacking docker-compose (2.32.4-3)…
Setting up docker-compose (2.32.4-3)…
Processing triggers for kali-menu (2026.1.5)…
Processing triggers for man-db (2.13.1-1)…
Scanning processes ...
```

4. Now, I will start the docker using command

Sudo systemctl start docker

5. Next command is of enabling docker

Sudo systemctl enable docker

```
┌──(root㉿kali)-[/home/ghost]
└─# sudo systemctl start docker

┌──(root㉿kali)-[/home/ghost]
└─# sudo systemctl enable docker
Synchronizing state of docker.service with SysV service script with /usr/lib/
systemd/systemd-sysv-install.
Executing: /usr/lib/systemd/systemd-sysv-install enable docker
```

6. Now, I will install docker in the mode of usermod in Kali Linux
   Sudo usermod -aG docker $USER

7. Now, I will pull all the docker and its settings at one place using
   Docker pull vulnerables/web-dvwa

8. Next command is of assigning the port of docker in my localhost of Kali Linux
   Docker run -d –name dvwa -p 8080:80 vulnerables/web-dvwa

```
┌──(root㉿kali)-[/home/ghost]
└─# sudo usermod -aG docker $USER

┌──(root㉿kali)-[/home/ghost]
└─# docker pull vulnerables/web-dvwa

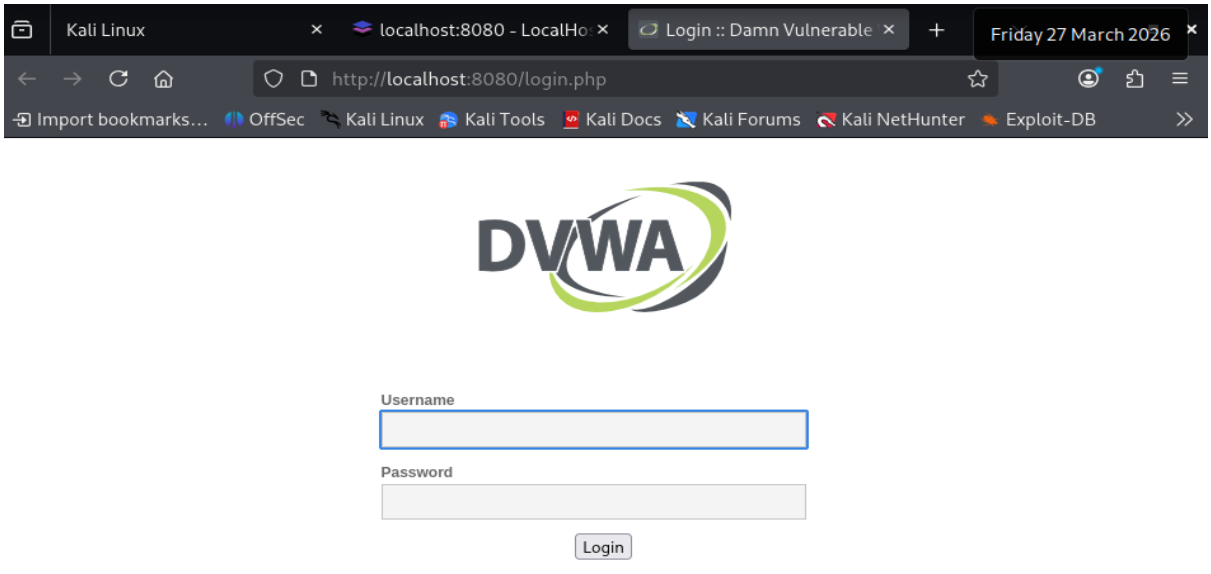
Status: Downloaded newer image for vulnerables/web-dvwa:latest
docker.io/vulnerables/web-dvwa:latest

┌──(root㉿kali)-[/home/ghost]
└─# docker run -d --name dvwa -p 8080:80 vulnerables/web-dvwa
98c9060e67f47c1c2baf5f62a5d910561e0fcab4a60aefb94cfe31eeb3f0641d
```

9. This is the last and final command for opening Dvwa in My Mozilla Firefox Browser.

http://localhost:8080

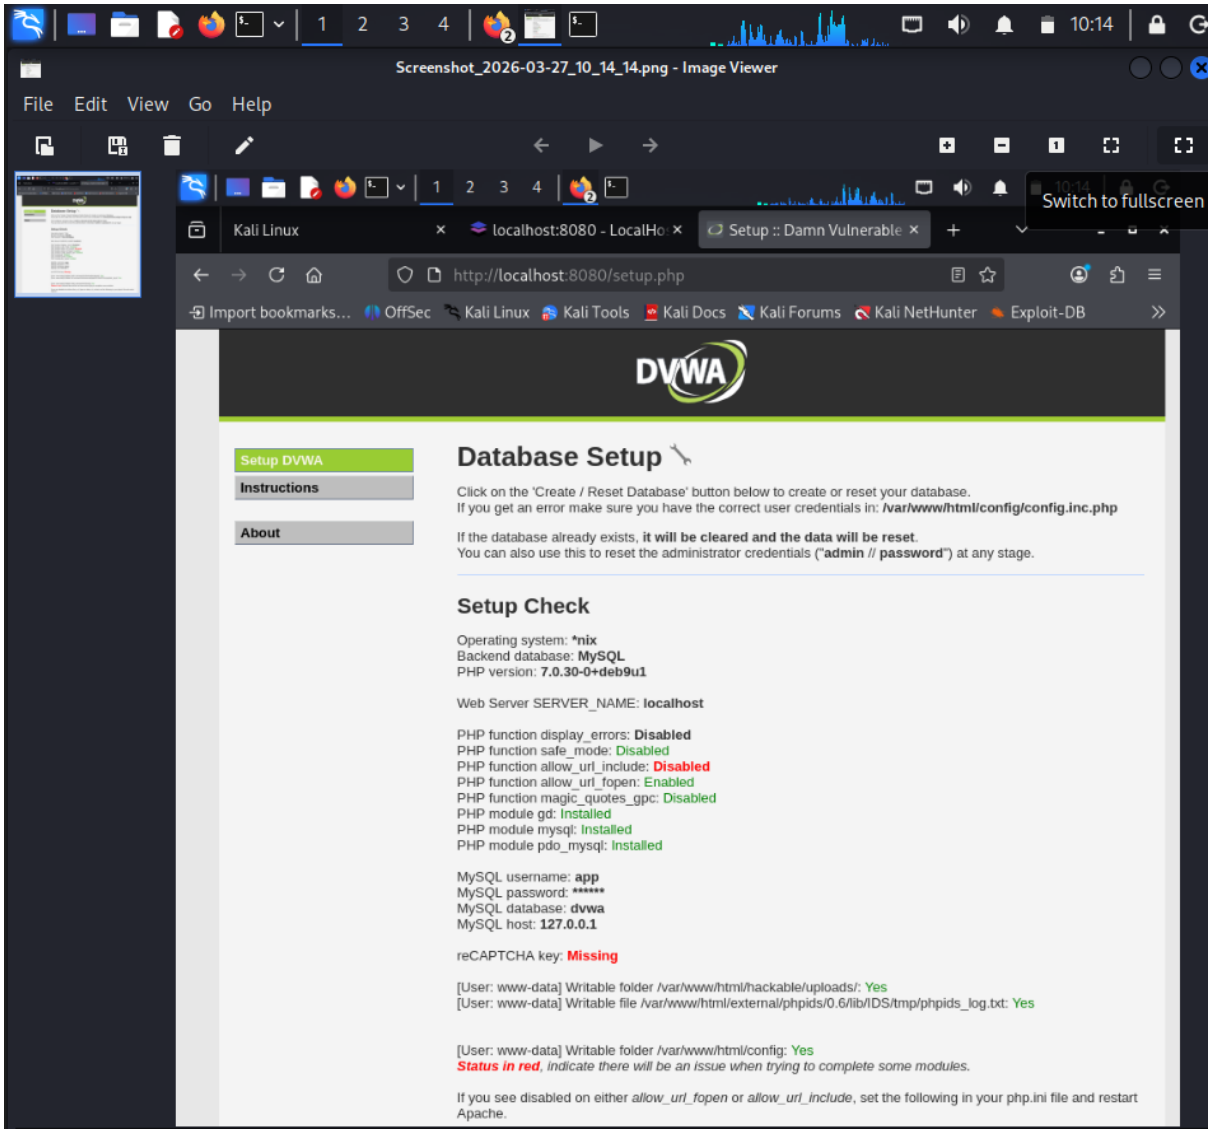


You have now successfully installed dvwa on Your Kali Linux machine.

Now, **username for dvwa is- admin**

And **password is- password.**

Now, you are successfully logged in.



THANK You for reading this repo.
If you found any error. Kindly message so that I can fix it.
